THALES

Product Information NFC Sensor Card - Thales LED

Feature	Standard Card*
Material	Multilayer laminate made of homogenous PVC foils
Colour	White, opaque
Surface	40 µm PVC Overlay
Dimensions	ISO 7810 ID-1
Card Thickness	0,80 ±0,04 mm
Operation Temperature	50 °C
Thermal Stability (one side fixed)	60 °C
LED-Colour*	Green
Surface lamination	Glossy, others on request
Connection between Antenna and LED	Soldering
Antenna technology	Copper wired antenna or printed antenna
Printed cards	Offset printing beneath the overlay
Signature panel	transparent, hot stamped, others on request
Subsequent printability	Thermotransfer or Dye sublimation printing

* Please ask for possible options.
  LED-Colours: Red, Yellow, Blue
